SUMMARY

Results-driven AI and Machine Learning developer with a strong foundation in Computer Science, proficient in Python, Java, SQL, and JavaScript. Experienced in designing and deploying supervised learning models, natural language processing (NLP) pipelines, and full-stack web applications. Demonstrated ability to improve model accuracy, reduce system response times, and deliver production-ready REST API integrations. Passionate about solving real-world problems through data-driven, scalable software solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, SQL, JavaScript
Web & Backend: Flask, FastAPI, RESTful APIs, HTML5, CSS3, Bootstrap, React 18
Database: MySQL
Tools: Git, GitHub, VS Code

EXPERIENCE

Machine Learning Intern

August 2025 – October 2025

LearnFlu

Remote

- Built supervised ML models using Python and Scikit-Learn on 50,000+ records, achieving 85%+ classification accuracy.
- Boosted model performance by 15% via feature engineering, cross-validation, and GridSearchCV hyperparameter tuning.
- Integrated ML models with RESTful APIs for real-time predictions, cutting system response time by 20%.

Frontend Development Intern

May 2025 – June 2025

Cognifyz Technologies

Remote

- Built responsive, mobile-first web pages with HTML5, CSS3, JavaScript, and Bootstrap, improving page load performance by 20%.
- Implemented client-side form validation and session handling, reducing user input errors by 30%.
- Ensured cross-browser compatibility across Chrome, Firefox, and Safari for consistent UI/UX on mobile and desktop.

PROJECTS

Agrico – AI-Based Crop Price Prediction System | *Python, Flask, Scikit-Learn, Random Forest, Pandas, NumPy*

- Architected a Random Forest regression platform to forecast crop prices from large-scale agricultural datasets using Pandas and NumPy.
- Deployed REST APIs to serve real-time price recommendations, enabling data-driven decisions based on historical market trends.

Agri-Rent & Resource Hub | *FastAPI, React 18, PostGIS, MySQL*

- Architected a decentralized P2P platform for agricultural machinery sharing with proximity-based resource discovery and asset monetization.
- Implemented cost modeling, fuel forecasting, and geospatial routing via PostGIS, achieving sub-31ms API response times in low-bandwidth environments.
- Automated transaction workflows with proximity matching and community trust-badge mechanisms to improve platform reliability.

AI-Based Autism Conversation Monitoring System | *Python, Flask, NLP, Naive Bayes, TF-IDF*

- Built an NLP pipeline using TF-IDF and Naive Bayes to classify patient-caregiver interactions by sentiment and emotional tone.
- Automated structured clinical progress reports, delivering engagement insights and longitudinal tracking to support caregiver decisions.

AWARDS & CERTIFICATIONS

- **Best Student Award 2025:** National Student Award, Novel Research Academy.
- **Oracle Professional Certifications:** Database SQL Certified Specialist | AI Vector Search Associate | APEX Cloud Developer.
- **NPTEL Certifications:** Principles of Management | Cyber Security | Internet of Things (IoT).

EDUCATION

SIMATS Engineering

Chennai, India

B.Tech in Artificial Intelligence and Machine Learning | CGPA: 8.8/10

2023 – 2027
